TREES STRAP MOUNTING / Sangle de Fixation Pour Arbre

1. Clip the strap hook on to the Base of the Ratcheting Buckle.
2. Place the Strap around the tree/ pole. Ensure that the back of the Junction Box is flush with the tree/pole and the wiring hole is pointing down.
3. Slip the end of the Strap through the slot in the Spool on the Ratcheting Buckle.
4. Pull the Strap end through the slot so that the strap is slightly snug around the tree/ pole, but leave enough slack for the strap to be adjusted in the future.
5. Adjust the junction box to the desired position by sliding along the strap.
6. Move the strap to the proper height on the tree/pole.
7. Tighten the strap by pulling the handle on the ratcheting buckle. Tighten enough to snug up the strap.
8. Wrap the loose strap around the ratcheting buckle.
9. Check strap for fit and wear over time. Tree growth and strap stretch may cause a need for periodic adjustments. Tighten or loosen as needed.

ELECTRICAL CONNECTIONS / Connections Électriques

1. Run conduit to Junction Box and attach using the right connector.
2. Feed appropriate power supply cable into the junction box.

FIXTURE MOUNTING / Installation du Dispositif

1. Feed the flying leads of the fixture into the mount hole in the box cover.
2. Thread the fixture onto the Box cover.
3. Feed the leads of the fixture through the Lock Nut.
4. Tighten the Lock Nut to attach the fixture to the Box cover.
5. Attach the supply cable to the leads by using the right sized watertight wire nuts (not supplied).
6. Tuck all wiring and connectors into the Junction Box.
7. Pack the foam gasket between the junction box and box cover.
8. Mount the box cover to the junction box using cover screws. Make sure foam gasket is not pinched.
Ensure power is OFF
Assurez que la puissance est sur OFF
