

KICKER REFLECTOR | INTERIOR ACCESSORIES

DATE	PROJECT	FIRM	TYPE
------	---------	------	------

TROV L60 Asymmetric Kicker Reflector works with the asymmetric optic to kick light up and back for tall ceilings, barrel coves, and rotundas used to improve uniformity when ceilings are more than 12in from the fixture.

Features:

- Reflector design allows light to wash the ceiling while also kicking light to the cove pocket.
- High reflectance white paint provides increased efficacy
- Recommended to use with L-Track
- Can be installed after fixture installation
- For use with L60 ASYM optic
- Not intended for use in wet locations

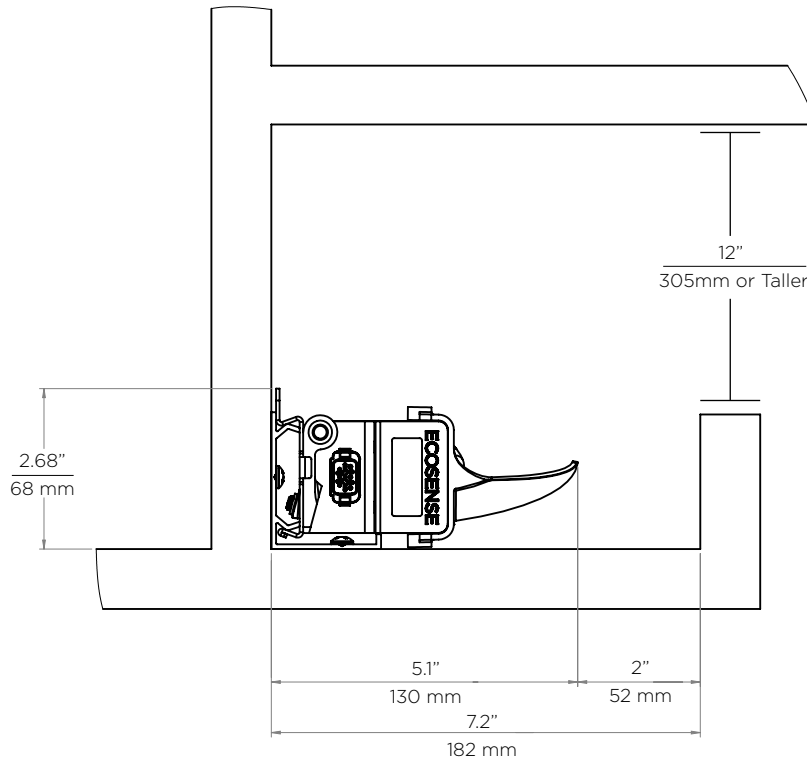

PHYSICAL	MATERIAL FINISH ENVIRONMENT	Injection molded UV stabilized polycarbonate, stainless steel hardware High reflectance white paint Indoor/Outdoor damp location
