EcoSpec® Floodlight Wash Wall Mount Arm

The Wall Mount Arm allows for cantilever mounting of the EcoSpec Floodlight Wash for various setbacks to achieve desired illumination effects and distributions. The Wall Mount Arm allows either up or down lighting for interior and exterior applications and is available in a range of lengths to fit every setback requirement. The Wall Mount Arms are fabricated from heavy-gauge steel, plated and then epoxy powder-coated in a neutral mid-gray for extra-long corrosion-free life. Final paint finishes are standard white and black to match the fixture, and custom colors are available to special order. These arms may be fixed directly to a panel or other architectural detail or mounted on a US-Style round box.

FOR USE WITH:
EcoSpec® Floodlight Wash
