

Eval Pool

What is the Eval Pool:

The EcoSense Eval Pool is a program that allows customers to experience and evaluate EcoSense products for 60 days at no cost. The Eval Pool includes TROV and RISE. Products are delivered quickly and are easily installed into any mock-up or project demo. Customers can appraise the quality of light and trial various beam angles in their actual project application for quick evaluation and smart decision making.

Who can participate:

The program is available to Rep Agents, VARs, Distributors and Specifiers from around the globe and all are encouraged to reach out to their local EcoSense regional Sales Manager for order placement.

When is the product available:

EcoSense Eval Pool is available all year and product typically ships in less than 2 weeks. Ship times may vary depending on availability, location and expedited requirements (charged separately).

How does it work:

1. Contact local EcoSense Regional Sales Manager (RSM) for specific project requirements. RSM will submit Eval Pool product order and send an Order Confirmation.
2. Use the product for 60 days and return for no charge. Samples retained beyond the 60 days are considered overdue.
 - To ensure that we have products available for all customers, we require a timely turnaround of these limited evaluation items. We monitor our customer's activity and after three incidences of overdue products, we are required to suspend the account for future Eval Pool shipments. To get back into the program, customer simply pays owed product invoices or returns all products.
 - All Eval Pool product should be returned to the following address:
EcoSense Lighting
c/o JSI Logistics
17246 S. Main Street
Gardena, CA 90248
