**ECOSENSE® LIGHTING HONORED WITH SIX PRESTIGIOUS
2015 PRODUCT INNOVATION AWARDS**

Winner of an unprecedented six awards for product development

Los Angeles, CA, March 11, 2015 — EcoSense, a fast-growing manufacturer of high-performance LED lighting technologies, announced today that it has received a record six(6) Product Innovation Awards (PIA) from Architectural SSL Magazine. EcoSense swept the cove/grazing category with five recognitions for these industry-leading products: Slim Cove INT™, EcoSpec® Linear INT, EcoSpec® Linear HP INT, EcoSpec® Linear INT High CRI 90+ and EcoSpec® Linear INT Warm Cove luminaires. A sixth award honored the EcoSpec® Linear Dimming Control Module - Plenum Rated for best controls technology.

Architectural SSL PIA awards program recognizes the latest product developments in the LED lighting industry. Winning products are selected from hundreds of new products released during the previous 12 months. EcoSense linear LED fixtures are high performing fixtures that are high respected by lighting designers for their design, quality, power, flexibility, and control options. EcoSpec Linear Dimming Control Module (LDCM) receives a 0-10V dimming signal and a fixed line voltage input and converts it to an ELV dimmed output. One LDCM can be used per run up to the maximum wattage.

“Now in our fifth year, the SSL luminaire and components market is really starting to come into its own, be it the maturation of products designed to replace forms we’ve all grown accustomed to, to exciting new forms and features that really show LED’s advancement as a technology that’s going to take us in completely new directions,” commented Jim Crockett, Editorial Director of Architectural SSL Magazine.

Mark Reynoso, CEO of EcoSense, says “It is an honor to be acknowledged for our luminaires and new dimming technology. We are passionate about designing unique and progressive products that are at the forefront of the lighting industry.”

###

About EcoSense

Founded by a team of long-serving industry experts with proven know-how in the development and best practices of solid-state illumination, EcoSense provides best-in-class LED lighting solutions for use in commercial and architectural applications. The company offers a comprehensive line of high-performance LED fixtures that meet the technical requirements of the most demanding projects while delivering substantial benefits over traditional lighting sources. EcoSense was established in 2008, is privately held and has received numerous accolades including two LUX Awards, three Product Innovation Awards (PIA), a Next Generation Lighting (NGL) Award and an Infiniti Award.

About Architectural Products Magazine

The Architectural SSL Product Innovation Awards (PIA) determine and honor the most innovative LED/ solid-state luminaires and fixtures on the market, while also recognizing the companies behind the components that make up these light sources. The PIA program also recognizes leaders in categories ranging from those conducting cutting-edge R+D, to those helping in the development of standards as well as those pushing to make solid-state lighting a truly sustainable technology.
