Ecosense is the recipient of 'Most Innovative Product of the Year Award' for Lore

Los Angeles, CA (June 2019) – Lore, from Ecosense, is awarded 'Most Innovative Product of the Year' at Lightfair International. With Lore, Ecosense debuts their latest technology including auto sensing protocol, 0.1% standard dimming, low glare/high control optics, & Lingo, a plug & play digital bus. All developed to simplify specification & save time.

“Receiving 'Most Innovative Product of the Year' from the lighting community, inspires us to continue developing and breaking new ground moving forward. We are proud to be recognized amongst all the other companies who are making contributions to the industry and cultivating unique solutions.”
Nate Quan, Senior Product Manager for Lore.

Lore is a full array downlight family with two aperture sizes – the series 60 and the series 90 - and covers 750 to 6000 lumens across the range. Ecosense offers all of the recessed housings and trims necessary to cover a wide range of applications. Additionally, the Lore cylinders include wall, ceiling, and suspended luminaires.

About Ecosense

Ecosense is a LED technology company that strives to invent, inspire, and reshape how the world understands and interacts with artificial light. Recognized by Red Dot for innovation and design, as well as Inc. 500 and Deloitte Technology Fast 500 for consistently making their fastest growing companies list. Ecosense serves a creative class of artists and designers and has provided light to some of the most coveted spaces on earth.
